

Cogongrass is a fast-growing, rapidly spreading perennial grass that continues to be an invasive species of great concern in Florida. This noxious weed disrupts ecosystems, decreases property values, and creates increased risk for fires.

What You Will Learn:

- ◆ Why cogongrass is a problem for landowners
- ◆ Strategies for cogongrass control

Who Should Attend:

- ◆ Landowners
- ◆ Realtors
- ◆ Residents with road frontage

Presented by UF/IFAS Extension Marion County, Florida Department of Agriculture & Consumer Services, Division of Forestry

Cogongrass Control Workshop
