Florida Project Learning Tree®

Project Learning Tree is a premier interdisciplinary natural resource education program. PLT provides supplementary environmental education curriculum materials designed around hands-on activities. The activities guide students from experiencing a concept to processing, generalizing, and applying. All of the activities are correlated with the Sunshine State Standards. Below are descriptions of the materials we offer to educators.

PreK-8 Activity Guide
Manual contains 96 multi disciplinary activities grouped by theme, storyline, and subject matter. Emphasis on reading connections, technology, differentiated instruction, and assessment techniques are found throughout the guide. Topics include: forests, wildlife, water, community planning, waste management, and energy.

Urban Forest Supplement
Help youth see their community’s urban forests as significant, valuable, and worth sustaining. Activities are based on three themes: urban forest ecology, benefits of an urban forest, and strategies for improving urban forest health.

Energy & Society™
Students learn about their relationship with energy and investigate the environmental issues related to energy’s role in society.

Secondary Education
These interdisciplinary modules for grades 9-12 encompass key concepts from social science, humanities, sciences, and math. Modules currently available are: Places We Live; Biodiversity; Focus on Forests; Forest Ecology; Focus on Risk; Municipal Solid Waste.

Places We Live Online Training
This self-paced training provides educators with a useful tool for placed based education to help create a bond between young citizens and their communities.

GreenWorks!
This service-learning component of PLT provides grants up to $5000 to PLT-trained educators to implement a service-learning project.
