

Guide to Admission

Natural Resource Conservation

The Natural Resource Conservation major allows students to focus their studies on their interests in natural resources and the environment and they vary from very focused and specific to broad and multi-disciplinary depending on the students' interests and career goals. Students can be admitted in two ways: as a freshman immediately after completing high school, or as a transfer student after earning 60 or more transferrable college credits from a community college, junior college, or other 4-year university. An *Associate of Arts* degree from a Florida institution is strongly encouraged, as it will satisfy all UF general education requirements.

Freshman Admissions - Students wishing to begin at the University of Florida as a freshman should visit www.ufl.edu and select "Admissions" for details on the application process. Be advised that freshman admission is extremely competitive.

Transfer Admissions - The School of Forest Resources and Conservation accepts transfer students into the Natural Resources Conservation major upon completion of the following requirements:

- completion of 60 transferable credit hours or an Associate of Arts degree from an accredited institution.
- completion of the UF foreign language requirement and CLAS Requirement.

- All prerequisite courses, listed below, must be completed with a cumulative GPA of 2.5 prior to admission, without exception.
