Course Description
This course will examine and compare the physiological adaptations of marine, coastal, and estuarine invertebrates to environmental conditions. The processes examined will span several levels of organization, from ecological and organismal to cellular and molecular. Examples will be drawn from rocky intertidal, salt marsh, coral reef, and deep sea habitats, among others.

Prerequisites: BSC 2010 and 2011 or equivalent; courses in animal physiology and ecology are recommended.

Instructor
Dr. Shirley Baker
Email: sbaker25@ufl.edu
Telephone: 352-273-3627 (office)
Office: Fisheries and Aquatic Sciences, 7922 NW 71st St
Office hours: By appointment at Millhopper or main campus

Teaching assistant
Erica Ross
Email: epross@ufl.edu

Student Learning Outcomes
At the end of this course, each student will be able to:
• Describe the basic principles and key mechanisms of physiological adaptation in a variety of invertebrate phyla
• Compare the physiology of invertebrate organisms adapted to marine, coastal, and estuarine environments
• Apply critical thinking in evaluating literature of the discipline
• Analyze the underlying importance of physiology in ecological patterns observed in communities and ecosystems

Course Meeting Times T 9 (4:05-4:55), R 8-9 (3:00-4:55)

Location Distance
Required Texts/Readings

1. There is no required textbook for this course. However, the following textbook is highly recommended; reading appropriate sections before the corresponding lecture will help clarify the topics discussed. This book can be purchased new, used, as an e-book, or as a rental, from a variety of online vendors.

2. Relevant readings from journals or other media will be posted for discussion.

Class Format, Policies on Attendance and Assignments

Course format:
This course will consist primarily of lecture and discussion. Students are expected to have read assigned materials prior to class sessions.

Late assignments:
Late materials will have 10% of the total possible points deducted for every day late.

Quiz policy:
Quizzes are open for a generous amount of time. Once a quiz closes, it will not be reopened.

Assignments

Introduction: **1 @ 5 points each.** Distance students will introduce themselves to the class by asynchronously sharing an audio/video file on VoiceThread. Further details and VoiceThread instructions will be provided. Introduction will be due by the 2nd day of class.

Literature review: **8 @ 5 points each.** A written review of the assigned literature will be due at 12pm on Literature discussion days (see schedule). Further details and a rubric will be provided.

Discussion participation: **8 @ 10 points each.** Approximately every two weeks (see schedule), the class will discuss papers from the primary literature. Readings will be posted on Canvas. Distance students may select from two participation options:
**Synchronous** – Students will join the Face-to-Face classroom discussion via LiveStream and Today’s Meet.
**Asynchronous** – DE students will discuss the literature with the instructor and TA via “Discussions” on Canvas. Further details and a rubric will be provided.
Assignments: 6 @ 20 points each. Students will develop a “Species Profile” over the course of the semester. Each of six assignments must be submitted to Canvas by 11:59pm on the due date (see schedule). The assignment will be graded, edited, and returned. When submitting the next assignment (e.g., Assignment #2), students are expected to submit the new section as well as correct the previous section (e.g., Assignment #1). Each assignment will add one (or more) paragraphs to the Species Profile. Primary scientific literature must be cited; no web sites may be used. Further details and a rubric will be provided.

  Assignment #1: Species selection justification  
  Assignment #2: Species description and habitat  
  Assignment #3: Reproduction and life history strategies  
  Assignment #4: Energy acquisition  
  Assignment #5: Respiration and oxygen transport  
  Assignment #6: Thermal adaptations or salinity adaptations or global change impacts

Quizzes: 5 @ 20 points each. Quizzes will be administered through Canvas (see schedule). Quizzes will consist of multiple choice, short answer, and short essays. Questions will be “open notes” but will require critical thinking, integration, and application of interdisciplinary concepts. Quizzes will open at 8am and close at 11:59pm on the dates noted.

Grad only - Species profile PowerPoint: Graduate students will develop their Species Profile into a PowerPoint presentation. Both a draft (1 @ 5 points) and the final product (1 @ 20 Points) will be graded. Further details and rubrics will be provided.

Grad only – Species profile presentation: 1 @ 30 points each. Graduate students will present their Species Profile to the class as a audio/video file via VoiceThread. Presentations must be at least 20 minutes in length. Students may respond to class questions synchronously, via LiveStream and Today’s Meet, or asynchronously via “Discussions” in Canvas. Further details and rubrics will be provided.

### Evaluation of Student Learning

Grading Scale

Final grades will be assigned based on the percentage of total points earned. For additional information on UF grading policies, see https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

A = 90-100% = 360-400 points
B+ = 85-89% = 340-359 points
B = 80-84% = 320-339 points
C+ = 75-79% = 300-319 points
C = 70-74% = 280-299 points
D = 60-69% = 240-279 points
F = < 60% = <239 points

Additional References

Background material for two of the lectures, *Life in Fluid* and *Symbioses*, is not available in the recommended Willmer et al. text book. Therefore, it is suggested that the following materials be read before the corresponding lectures to help clarify the topics. These books can be purchased new, used, as an e-book, or as a rental, from a variety of online vendors. Older editions may be available in the UF library.

Other Information

Academic Honesty, Software Use, UF Counseling Services, Services for Students with Disabilities

In 1995 the UF student body enacted an honor code and voluntarily committed itself to the highest standards of honesty and integrity. When students enroll at the university, they commit themselves to the standard drafted and enacted by students.

In adopting this honor code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the university community. Students who enroll at the university commit to holding themselves and their peers to the high standard of honor required by the honor code. Any individual who becomes aware of a violation of the honor code is bound by honor to take corrective action. The quality of a University of Florida education is dependent upon community acceptance and enforcement of the honor code.

The Honor Pledge: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.

On all work submitted for credit by students at the university, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

The university requires all members of its community to be honest in all endeavors. A fundamental principle is that the whole process of learning and pursuit of knowledge is diminished by cheating, plagiarism and other acts of academic dishonesty. In addition, every dishonest act in the academic environment affects other students adversely, from the skewing of the grading curve to giving unfair advantage for honors or for professional or graduate school admission. Therefore, the university will take severe action against dishonest students. Similarly, measures will be taken against faculty, staff and administrators who practice dishonest or demeaning behavior.
Students should report any condition that facilitates dishonesty to the instructor, department chair, Student Honor Council, or Student Conduct and Conflict Resolution in the Dean of Students Office.

(Source: 2011-2012 Undergraduate Catalog)

It is assumed all work will be completed independently unless the assignment is defined as a group project, in writing by the instructor.

This policy will be vigorously upheld at all times in this course.

**Software Use:**

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

**Campus Helping Resources**

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.
